

**BDA LAB WEEK-2**  
**CS255**

```
Atlas atlas-hhqb90-shard-0 [primary] BDALab> db.Student.drop()  
true  
Atlas atlas-hhqb90-shard-0 [primary] BDALab>
```

**I. Perform the following DB operations using MongoDB.**

1. Create a database “Student” with the following attributes Rollno, Age, ContactNo, Email-Id.
2. Insert appropriate values
3. Write query to update Email-Id of a student with rollno 10.
4. . Replace the student name from “ABC” to “FEM” of rollno 11
